Welcome to East Lansing, Home of Michigan State University

On behalf of the Michigan State University Department of Entomology, we are pleased to welcome you to the 57th Annual North Central Branch meeting of the Entomological Society of America in East Lansing. As usual, our meeting covers significant research and extension activities in major cropping systems, featuring symposia on Bt corn, extension entomology, and the recently released GAO report on integrated pest management. But we also highlight the many important minor crops grown in Michigan and the North Central region, with symposia on organic fruit production, beetle problems in small fruit, and biological control in the urban landscape.

Another focus of our meeting is entomology education of both children and adults. On Sunday, speakers — including public school teachers — share their experiences using insects in the classroom. The ‘Get-Bugged’ program on Tuesday morning brings 120 local elementary students into our main meeting room, where they will display entomology science projects. The graduate student symposium on Wednesday features a hands-on ‘Tubenrope’ workshop, designed to increase research efficiency of adult scientists.

The Program Committee would like to thank the speakers, donors, and volunteers who gave their time and energy to make this meeting possible. We hope you enjoy the 57th Annual Meeting, and have a productive visit to East Lansing and the Michigan State University Campus.

Michigan State University

MSU was founded in 1855 as the nation’s first land-grant university. It was the first institution of higher learning in the nation to teach ‘scientific agriculture’, and became the prototype for the land-grant institutions established under the Morrill Act in 1862. Current enrollment on the MSU campus is 43,400 students — 34,342 undergraduates, 7,657 graduate students, and 1,367 professional students.

The MSU campus is located east of Michigan’s capital city, Lansing, in the aptly named city of East Lansing. The Campus has 5,200 acres of land, split between a 2,100-acre main campus to the north and 3,100 acres of research farms and natural areas to the south. The Red Cedar River flows through the center of the main campus. North of the river are older, more traditional buildings housing administration, the MSU Union, the library, museum, ten older residence halls, and several academic departments (including Entomology, in the Natural Science Building). South of the river are modern residence halls, sports arenas, the medical complex, the Wharton Center for Performing Arts, the Agricultural Pavilion, the Detroit College of Law, and sophisticated scientific research laboratories (including most of the departments in the College of Agriculture and Natural Sciences).

A few fast factoids about MSU:

- ◆ MSU has several important collections of plantings, most famous the W. J. Beal Botanical Garden, the oldest continuously operated (128 years) university botanical garden in the country.
- ◆ Michigan State University operates the largest residence hall system in the U.S, housing over 17,000 students in 24 buildings.
- ◆ The world's largest non-military cafeteria is in the Brody Residence Hall Complex, across the street from the Kellogg Center.
- ◆ MSU has one of the largest study abroad programs in the country. Over a quarter of MSU students travel abroad during their degree program.
- ◆ MSU is the only university with three on-campus medical schools, graduating medical doctors, osteopathic physicians, and veterinarians.
- ◆ MSU is home to four national research facilities — The National Superconducting Cyclotron Laboratory (home of the world's highest energy continuous-wave accelerator), the Department of Energy Plant Research Laboratory, the Center for Microbial Ecology, and the National Center for Food Safety and Toxicology.

Registration

Registration badges are required for admission to all functions. The registration desk is in the Big Ten Room A and will be open for check-in for those who pre-registered and for on-site registration during the following times:

Sunday	10:00 AM - 6:00 PM
Monday	7:30 AM - 5:00 PM
Tuesday	7:30 AM - 5:00 PM
Wednesday	7:30 AM - Noon

Messages, Program Changes, Lost & Found

A message board and tacks will be available in the registration area for posting announcements. Changes in the scheduled program and other meeting news will also be posted here. Notices concerning changes in the scheduled program should be submitted to the meeting registration desk. Lost

and found articles may be turned in and retrieved at the registration desk.

For Spouses and Guests

Please check at the registration desk for spouse/guest information.

Employment Opportunity Center

The Employment Opportunity Center is located in the Heritage Room. Employers are invited to advertise available positions and job seekers are encouraged to distribute their vitae in the folders provided in the room.

Audio-Visual Equipment

All rooms will be equipped with 35-mm slide projectors designed to use standard 80-slide carousels, an overhead transparency projector, an IBM compatible laptop (notebook) computer, and a LCD video projector. Each speaker **MUST** provide slides in a carousel, marked with his/her own name and paper number, to the projectionist a minimum of 10 minutes **BEFORE** the beginning of the session. Extra slide carousels will **NOT** be available in the meeting rooms. As for electronic presentations (95, 97, or 2000 PowerPoint, Windows **ONLY**), because of compatibility issues, we will **NOT** permit "hot-synch" swapping of laptops during the paper sessions. For presenters who did not successfully upload his/her presentation via the NCB-ESA website as requested, **ALL** presentations **MUST** be loaded onto a respective laptop the preceding day, with the exception of the opening day (Sunday); **NO EXCEPTIONS!** The Heritage Room in the Kellogg Hotel and Conference Center will serve as the Audio/Visual Room. This A/V room will be available between 5:00 - 6:30 p.m. each day, and from 11:00-12:30 p.m. on Sunday prior to the commencement of the first presentations. Your presentation **MUST** be on removable media such as ZIP (100 or 250 MB), 3.5" floppy disks, or CD (700 MB/80 MIN). We can **NOT** directly cable (link) two laptops for file transfer using software such as LapLink, because of software security and compatibility issues.

Poster Presentations

Poster presentations (Student Competition & Submitted) will be set up throughout the meeting in the Big Ten Room A. Posters should be set up on Sunday, 4:00-8:00 PM and must be removed Tuesday afternoon between 4:30-6:00 PM. Authors (Student Competition and Submitted) are requested to be at their poster(s) to answer questions between 4:00-5:00 PM on Monday and 3:30-4:30 PM on Tuesday.

Guidelines for Speakers and Moderators

Speakers and moderators will follow standard practices for ESA meetings. Moderators are responsible for maintaining the printed schedule, by not starting any presentation before the scheduled time and by not allowing any speaker to exceed the allotted time for his/her presentation. Speakers that exceed their allotted presentation time will be requested by the moderator to conclude their presentation immediately. Please be considerate of others. Moderators in each room should obtain a pointer and timer from the Audio-Visual Room (Heritage) prior to their session. Pointers and timers should be returned to the Audio-Visual Room immediately after the session concludes. The ESA guidelines state that no smoking is allowed in any meeting room.

SPECIAL EVENTS

“Get Bugged” Insect Exposition Tuesday, 10:00 - Noon Big Ten Room A

Local grade school students will present their entomological projects to the ESA members during this 2-hour session. The “Get Bugged” Mentor Program was developed to take Michigan State University entomology students off campus and into community classrooms. Beginning in the fall of 1999, the Outreach office worked in concert with the Lansing School District to design a program that runs during the academic school year. The fall term was dedicated to providing teacher training workshops. In the spring term, participating classrooms were paired with a graduate student mentor. This partnership culminates with a “Get Bugged” Insect Exposition, where the mentor and students share their classroom projects and experiments. Those interested in this program and its outcomes are welcomed to visit this mini meeting within a meeting. To learn more visit <http://www.ent.msu.edu/dept/docs/mentorpro.html>.

Student Mixer Monday, 8:30-10:30 PM Big Ten Room B

As usual, the **Student Affairs Committee** will sponsor an evening mixer (snacks and beverages provided). Potential employers and professors in search of graduate students will be invited to attend in an effort to facilitate meetings with interested students. The mixer will start immediately following the Linnaean games.

Student Affairs Symposium: Tubenrope
Wednesday, 9:00 - Noon
Room 106

The “Tubenrope” workshop is a hands-on exercise developed to increase the research efficiency of scientists regardless of their field or discipline of study. The workshop uses a unique physical puzzle to help burgeoning researchers use and communicate the “Strong Inference” approach to hypothesis testing. This workshop was developed and will be facilitated by Dr. Jim Miller, Professor of Entomology at Michigan State University. Dr. Miller leads the students in formalizing logical approaches to puzzle solving, focusing on how to move from observations, descriptions and eventually to the underlying mechanisms of any system; the value of constructing multiple conceptual models with distinct and explicit predictions; how to decide which experiments are most powerful in testing those models; and increasing research efficiency with logical research structures. For several years, Dr. Miller has taught this exercise as part of his course, “The Nature and Practice of Science”, that introduces these topics and more to graduate students interested in a career in the sciences.

MSU Bug House Tour
Wednesday, 10:00 - Noon

MSU students will conduct a tour of the Bug House. A shuttle service will transport NCB-ESA members to visit this mini museum of live and pinned insects with an accompanying gift shop. Please indicate your interest in visiting the Bug House and using the shuttle service when you first sign-in at the Kellogg Center. For more info and pictures visit <http://www.ent.msu.edu/bughouse/index.html>

2002 NORTH CENTRAL BRANCH AWARD RECIPIENTS

C. V. Riley Achievement Award

John E. Foster

University of Nebraska

Dr. Foster is an outstanding scientist, whose record of over 100 research publications, book chapters, about \$3 million in grant support, and many, many speaking invitations all point to the strength of his academic record. He has made substantial contributions in small grain breeding, particularly wheat resistance to insects. His work on the genetics of Hessian fly resistance has proven a major contribution to the protection of wheat from this potentially devastating pest. In his many publications on these various crops, Dr. Foster has not only made important theoretical and practical contributions to our understanding of plant resistance to insects, but also he has developed and contributed to interdisciplinary teams working on multiple pest problems. Consequently, much of Dr. Foster's scientific background speaks to issues involving plant disease and agronomic issues in the development of new crop cultivars. To date Dr. Foster has either led or been part of the teams that have released 9 germplasm lines and 8 cultivars. Beyond his work as an individual scientist, Dr. Foster has served in many cooperative and administrative roles. Through his international work, Dr. Foster has had a significant impact on the plant resistance efforts of many research programs throughout the globe.

John Henry Comstock Graduate Student Award
Andrew B. T. Smith
University of Nebraska

Andrew B. T. Smith earned a B.Sc. with honors in biology (1994) from Carleton University (Ottawa, Canada), a M.Sc. in zoology (1997) from the University of Toronto (Canada). He is currently finishing a Ph.D. in entomology from the University of Nebraska-Lincoln (UNL) as a member of “Team Scarab” at the State Museum. His research involves the systematics, biogeography, and evolution of scarab beetles with emphasis on Neotropical Rutelinae. He has already produced over 10 scientific papers in the field of scarab systematics. During the course of his Ph.D., he has enhanced his research through field and museum work in Ecuador, Venezuela, Honduras, Nicaragua, El Salvador, and Brazil and museum work in France, Germany, and the United Kingdom. Andrew received the Keith Kevan Scholarship in recognition of high scholastic achievement and excellence in graduate studies in entomological systematics from the Entomological Society of Canada in 1999. He was elected as a counselor for the Coleopterists Society for the 2001-2002 term. He has also received four fellowships and scholarships and numerous grants to conduct research and attend meetings during his time at UNL. Andrew has provided many services to the scarab research community, including the development of the SCARABS-L listserve (with almost 100 subscribers worldwide), organizing the SOLA Scarab Workers Conference at the ESA annual meeting (2001, 2002), and co-organizing the “Systematics Studies in Scarabaeoidea” symposium at the International Congress of Entomology in Brazil (2000).

NCB Graduate Scholarship Award
Jason P. Harmon
University of Minnesota

Jason P. Harmon is currently completing his Ph.D. thesis, “Indirect interactions among a generalist predator and its multiple foods” at the University of Minnesota under Dr. David Andow. Jason’s skills and interests are centered in the study of community and population biology of natural enemies and their prey in agroecosystems. His thesis has focused on the direct and indirect effects that occur when a generalist predator has access to multiple prey items and how those interactions ultimately can affect predation of a target pest. Jason’s work has been funded primarily by an EPA Science to Achieve Results Fellowship as well as through two fellowships from the University of Minnesota Graduate School. His research experiences at Minnesota and as an undergraduate student at the University of Wisconsin have thus far resulted in six publications, four additional publications in review, and ten presentations at national and branch meetings. Jason has a strong interest in teaching, having co-developed and taught three new graduate level courses and given guest lectures in others. He has been active professionally and has served as Chair of the NCB Student Affairs Committee and has been a member of the Long Range Planning Committee.

Symposium

Using Insects in Science Based Inquiry

1:00 - 5:00 PM

John Willy Room

Organizers and Moderators

Tiffany Heng-Moss and Marion Ellis

Department of Entomology

University of Nebraska

Lincoln, NE 68583-0816

- 1:00 001 Introduction and opening remarks.
Tiffany M. Heng-Moss, Department of Entomology, University of Nebraska, Lincoln, NE, 68583
- 1:05 002 Insects and science inquiry at the college level.
Daniel K. Young, 445 Russell Laboratories, University of Wisconsin, Madison, WI, 53706
- 1:35 003 Our Zoo to You: Using insects in inquiry-based instruction with K-12 students.
Tiffany M. Heng-Moss, 202 Plant Industry, University of Nebraska, Lincoln, NE, 68583, Mimi Wickless, 1222 South 27th Street, Folsom Children's Zoo and Botanical Gardens, Lincoln, NE, 68502, Lois Mayo, Lincoln Public Schools, Lincoln, NE
- 2:05 004 WOWBUGS - A model for inquiry - based instruction.
Robert Matthews, Department of Entomology, University of Georgia, Athens, GA, 30602
- 2:35 005 Paying it Forward: Teaching teachers teaching kids.
Cathy Bristow, 332 Natural Science, Michigan State University, East Lansing, MI, 48824, Connie Eisenhart, East Lansing, MI
- 3:05-3:20 Break**

- 3:20 006 Bumble Boosters: A community of learners investigating science with bumble bees.
Douglas A. Golick, 208 Plant Industry Bldg., University of Nebraska, Lincoln, NE, 68583
- 3:50 007 An advanced bug camp for youth focused on teaching science process skills.
Maryann Frazier, 501 Ag Science and Industries Bldg., Penn State University, University Park, PA, 16802
- 4:20 008 The moth of scientific literacy.
Martha R. Lutz, 202 PI Bldg., University of Nebraska, Lincoln, NE, 68583-0816
- 4:50 009 Closing remarks.
Marion D. Ellis, Department of Entomology, University of Nebraska, Lincoln, NE, 68583

March 24, 2002
Sunday Afternoon

BCE Symposium
Future Trends in Cutting Edge Research in
Entomology
1:00 - 5:30 PM
Room 103AB

Organizer and Moderator

Shripat T. Kamble
Department of Entomology
University of Nebraska
Lincoln, NE 68583-0816

- 1:00 010 Introduction: Future trends in cutting edge research in entomology.
Shripat T. Kamble, 201A PI, Department of Entomology, University of Nebraska, Lincoln, NE, 68583-0816
- 1:05 011 Cutting edge research in insect genetics.
Jeff Stuart, Department of Entomology, Purdue University, West Lafayette, IN, 47907

- 1:35 012 Future trends in insect toxicology research.
Ke Dong, Department of Entomology,
Michigan State University, East Lansing, MI,
48824
- 2:05 013 Trends in insect physiology.
Russell Jurenka, 407 Science II, Iowa State
University, Ames, IA, 50011-3222
- 2:35 014 New research trends in corn rootworm
management.
Lance Meinke, Department of Entomology,
University of Nebraska, Lincoln, NE, 68583-
0816
- 3:05-3:20 Break**
- 3:20 015 Future trends in application of molecular
techniques in urban entomology.
Michael Scharf, Department of Entomology,
Purdue University, West Lafayette, IN, 47907-
1915
- 3:50 016 Future trends in cutting edge research in turf
insect control.
Timothy Gibb, Department of Entomology,
Purdue University, West Lafayette, IN, 47907
- 4:20 017 Future trends in cutting edge research in
transgenic entomology.
Ty Vaughn, Agricultural Sector-Insect Control,
Monsanto Inc, Chesterfield, MO, 63198
- 4:50 018 Cutting edge research in insect-host plant
interaction.
Gary Felton, Department of Entomology, The
Pennsylvania State University, University Park,
PA, 16802

Jonathan G. Lundgren, 320 Morrill Hall; 505 S. Goodwin Avenue, University of Illinois, Urbana, IL, 61802, Robert N. Wiedenmann, 607 E. Peabody Drive, Illinois Natural History Survey, Champaign, IL, 61820
- 10:57 029 Conservation biological control of evergreen bagworms (Lepidoptera: Psychidae): Relative roles of vertebrate and invertebrate natural enemies.
Jodie A. Ellis and Lawrence M. Hanks, 320 Morrill Hall, 505 S. Goodwin Avenue, University of Illinois, Urbana, IL, 61801

- 11:09 030 Development of phenological models for *Apthona* spp. introduced to control leafy spurge. **Luke C. Skinner** and David W. Ragsdale, Department of Entomology, 1980 Folwell Ave, University of Minnesota, St. Paul, MN, 55108, Monika Chandler, 90 West Plato Blvd, Minnesota Department of Agriculture, St. Paul, MN, 55107
- 11:21 031 Resistance to methamidophos of the green peach aphid (Homoptera: Aphididae) from potato seed production and commercial potato areas in the Pacific Northwest. **David Mota-Sanchez**, 243 Natural Science Building, Department of Entomology and CIPS, Michigan State University, East Lansing, MI, MI, 48824, Mark E. Whalon, B-11 Center for Integrated Plant Systems, Department of Entomology and CIPS, Michigan State University East Lansing, MI, 48824, Keith S. Pike and George Graf, 24106 N. Bunn Road, Washington State University, Prosser, WA, 99350-9687
- 11:33 032 Movement of southwestern and European corn borer (Lepidoptera: Crambidae) moths from refuge fields into large Bt-corn fields. **Jawwad A. Qureshi**, Lawrent L. Buschman, Randall A. Higgins, Phillip E. Sloderbeck, James E. Throne and Sonny B. Ramaswamy, 123 West Waters Hall, Department of Entomology, Kansas State University, Manhattan, KS, 66506
- 11:45 033 Sublethal effects of transgenic corn on the dispersal and fecundity of western corn rootworms. **Ted A. Wilson** and Jon J. Tollefson, 17 Insectary, Iowa State University, Ames, IA, 50011
- 11:57 034 Control of potato tuber moth in field and storage in Egypt with Bt-transgenic potato lines. **Francisco Santos-Gonzalez**, Edward J. Grafius, Walter L. Pett and Dave S. Douches, Department of Crop and Soil Science, Michigan State University, East Lansing, MI, 48823, Madgi A. Madkour and Taymour El-Nasr, 9 Gamaa Street, Agricultural Genetic Engineering Research Institute, Giza, Giza, Egypt, 12619

- 12:09 035 Is popcorn a suitable refuge plant for resistance management of *Ostrinia nubilalis* (Hübner) and the *Diabrotica* complex?
Colothdian D. Tate, 103 Genetics Lab, Iowa State University, Ames, IA, 50014, Richard L. Hellmich and Leslie C. Lewis, Iowa State University, 106 Genetics Lab, USDA-ARS Corn Insects and Crop Genetics Research Unit, Ames, IA, 50011
- 12:21 036 A GIS study of the influence of landuse on Japanese beetle trap catches.
CANCELLED
 Randy M. Hamilton, Bill R. Foster, Timothy J. Gibb and Cliff S. Sadof, 1158 Smith Hall, Purdue University, West Lafayette, IN, 47907

March 25, 2002

Monday Morning

**Submitted Papers
 Student Competition
 Undergraduate and M. S.**

Sections Ca-c & Ce-f
 10:45 AM - 12:30 PM
 Room 103AB

Moderator: Ian MacRae
 Department of Entomology
 University of Minnesota
 Crookston, MN 56716

- 10:45 037 Effect of six insecticides on survival of *Macrocentrus linearis* (Nees.) (Hymenoptera: Braconidae) a parasitoid of the obliquebanded leafroller, *Choristoneura rosaceana* (Harris) (Lepidoptera: Tortricidae).
Tammy K. Wilkinson and Larry J. Gut, 204 Center for Integrated Plant Systems, Michigan State University, East Lansing, MI, 48824, William C. Kauffman, 2534 South 11th St., USDA APHIS Niles, Plant Protection Center, Niles, MI, 49120, Douglas A. Landis, 204 Center for Integrated Plant Systems, Michigan State University, East Lansing, MI, 48824

- 10:57 038 Host density and agricultural landscape complexity: impacts on parasitoid community responses to *Pseudaletia unipuncta* Haworth in Michigan.
Alejandro C. Costamagna, 204 Center of Integrated Plant Systems, Department of Entomology, Michigan State University, East Lansing, MI, 48824, Fabián M. Menalled, 308 National Tilth Laboratory, Department of Agronomy, Iowa State University, Ames, IA, 50011, Paul C. Marino, Department of Biology, University of Charleston, Charleston, SC, 29424, Doug A. Landis, 204 Center of Integrated Plant Systems, Department of Entomology, Michigan State University, East Lansing, MI, 48824
- 11:09 039 Mark, release and recapture of *Harmonia axyridis* (Pallas) (Coleoptera: Coccinellidae) in Wisconsin soybeans.
Bob A. Ellingson and David B. Hogg, 437 Russell Labs, 1630 Linden Dr., Department of Entomology, University of Wisconsin-Madison, Madison, WI, 53706
- 11:21 040 Mid-season foliar and ground-dwelling natural enemies: impact on soybean aphid, *Aphis glycines* Matsumura, populations.
Tyler Fox and Douglas A. Landis, 204 Center for Integrated Plant Systems, Michigan State University, East Lansing, MI, 48824
- 11:33 041 The effect of bean pod mottle virus inoculation at various growth stages on soybean seed discoloration and yield.
David L. Dorhout, Rayda K. Krell, Larry P. Pedigo and John H. Hill, Department of Plant Pathology, 403B Bessey Hall, Iowa State University, Ames, IA, 50011

- 11:45 042 Soybean aphid host range and virus transmission efficiency.
Robbie J. Alleman, Room 237 1630 Linden Drive, University of Wisconsin, Madison, WI, 53706, Craig R. Grau, 1630 Linden Drive, University of Wisconsin-Madison, Madison, WI, 53706, David B. Hogg, Room 237, 1630 Linden Drive, University of Wisconsin, Madison, WI, 53706
- 11:57 043 Ground beetle species differ in their use of wet meadow-cottonwood forest ecotone along the Platte River in south central Nebraska.
Justin R. Krahulik and W. Wyatt Hoback, Department of Biology, Bruner Hall of Science, 905 West 25th Street, University of Nebraska at Kearney, Kearney, NE, 68849
- 12:09 044 Lignin-based formulations to encapsulate *Beauveria bassiana* for protection against simulated solar energy.
Katherine M. Girsch and Robert W. Behle, 1815 N. University St., USDA-ARS, Peoria, IL, 61604-3999
- 12:21 045 Development of bioinsecticide methodology for sugarbeet root maggot (Diptera: Otitidae) management.
Nyle B. Jonason and Mark A. Boetel, Department of Entomology, 202 Hultz Hall, North Dakota State University, Fargo, ND, 58105, Larry G. Campbell, Northern Crop Science Laboratory, USDA-ARS, Fargo, ND, 58105, Larry J. Smith, Northwest Research and Outreach Center, University of Minnesota, Crookston, MN, 56716, Stefan T. Jaronski, Northern Plains Agricultural Research Center, USDA-ARS, Sidney, MT, 59270

March 25, 2002

Monday Morning

Submitted Papers

Student Competition

Undergraduate and M.S.

Sections Cd & F

10:45 AM - 12:30 PM

Room 105AB

Moderator: Billy Fuller

Department of Plant Science

South Dakota State University

Brookings, SD 57007

- 10:45 046 Flies in the soup and maggots in the marmalade: A laboratory exercise to investigate food contamination by insects.
Megan Jehorek and W. Wyatt Hoback, 905 W. 25th Street, University of Nebraska at Kearney, Kearney, NE, 68849
- 10:57 047 New records of carrion beetles in Nebraska reveal increased range of American burying beetle.
Daniel G. Snethen, Little Wound High School, Colome, SD, 57528, Andrew A. Bishop and W. Wyatt Hoback, 905 W. 25th Street, University of Nebraska at Kearney, Kearney, NE, 68849
- 11:09 048 The effect of corn phenology on establishment success of western corn rootworm larvae.
Yvonne M. Schweikert, 204 Curtis Hall, University of Missouri, Columbia, MO, 65211-7020, Bruce E. Hibbard, 204 Curtis Hall, University of Missouri, USDA-ARS, Columbia, MO, 65211
- 11:21 049 Potential tritrophic interactions in a decomposition food chain.
Erin E. Hladilek and David A. Andow, 1980 Folwell Ave. , 219 Hodson Hall, University of Minnesota, St. Paul, MN, 55108

- 11:33 050 Adult habitat utilization by four *Diabrotica* species at prairie-corn interfaces.
Laura A. Campbell and Lance J. Meinke, 202 Plant Industry, University of Nebraska-Lincoln, Lincoln, NE, 68583-0816
- 11:45 051 Second generation European corn borer damage reduces potato yield of some varieties in south central Nebraska.
Jesse R. Ziems and W. Wyatt Hoback, 905 W. 25th Street, University of Nebraska at Kearney, Kearney, NE, 68849, Thomas E. Hunt, Haskell Agricultural Laboratory, 57905 866 Road, University of Nebraska at Lincoln, Concord, NE, 68728
- 11:57 052 Sand chafer phenology in south central Nebraska may reveal control options.
Ben J. Zechmann, Jesse Ziems and W. Wyatt Hoback, Department of Biology, 905 W. 25th Street, University of Nebraska at Kearney, Kearney, NE, 68849
- 12:09 053 Relationships among potato leafhoppers, glandular-haired alfalfa, and timing of insecticide application.
Reid B. Durtschi, David B. Hogg and John L. Wedberg, 237 Russell Labs, 1630 Linden Dr., University of Wisconsin-Madison, Madison, WI, 53706
- 12:21 054 Host plant phenology effects on seasonal abundance and activity of tarnished plant bugs (Heteroptera: Miridae) in the Red River Valley.
Justin O. Knott, Phillip A. Glogoza and Mark A. Boetel, Department of Entomology, 202 Hultz Hall, North Dakota State University, Fargo, ND, 58105

March 25, 2002
Monday Afternoon

President's Symposium
U.S. GAO Report on IPM: A North Central
Response

1:30 - 4:30 PM
Auditorium

Organizers and Moderators

Susan T. Ratcliffe and **Michael E. Gray**

University of Illinois
Department of Crop Sciences
1102 S. Goodwin Avenue
S-316 Turner Hall
Urbana, IL 61801

- 1:30 055 Introduction and opening remarks.
Susan T. Ratcliffe and Michael E. Gray,
Department of Crop Sciences, University of
Illinois, Urbana, IL, 61801
- 1:45 056 The GAO report on IPM: Successes and
failures.
Chuck Barchok, 441 G. Street N.W., Room
2078, U.S. GAO Office, Washington, D.C.,
20548
- 2:15 057 Vegetable IPM: Implementation without
documentation?
Rick Weinzierl, 1102 S. Goodwin Avenue,
University of Illinois, Urbana, IL, 61801
- 2:30 058 Regional IPM: The center approach.
Larry Olsen, B18 National Food Safety &
Toxicology Building, Michigan State
University, East Lansing, MI, 48824
- 2:45 059 Fruit IPM: Alive and well in the North Central
region.
David Epstein, B18 National Food Safety &
Toxicology Building, Michigan State
University, East Lansing, MI, 48824
- 3:00-3:15 Break**

- 3:15 060 Urban IPM: Progress and challenges.
Clifford S. Sadof, Department of Entomology,
 1158 Smith Hall, Purdue University, West
 Lafayette, IN, 47906-1158
- 3:30 061 Field Crop IPM: The GMO debate.
Kevin Steffey, 1102 S. Goodwin Avenue,
 University of Illinois, Urbana, IL, 61801
- 3:45 062 Weed IPM: Herbicide use or abuse?
Michael Owen, 2104 L Agronomy, Iowa State
 University, Ames, IA, 50011
- 4:00 063 Questions and panel discussion.
Michael E. Gray and Susan T. Ratcliffe,
 Department of Crop Science, University of
 Illinois, Urbana, IL, 61801

March 25, 2002

Monday Afternoon

Symposium

**Systematics and Biodiversity Research in the
 Northcentral Region**

1:30 - 5:00 PM

Lincoln Room

Organizer and Moderator

Daniel K. Young

Department of Entomology

445 Russell Laboratories

University of Wisconsin

Madison, WI 53706

- 1:30 064 Symposium overview.
Daniel K. Young, Department of Entomology,
 University of Wisconsin, Madison, WI, 53706
- 1:35 065 The ground beetles (Coleoptera: Carabidae) of
 northeastern Iowa: Habitat utilization patterns.
Kirk J. Larsen, 700 College Drive, Luther
 College, Decorah, IA, 52101

- 1:55 066 The Scarabaeoidea (Coleoptera) of Wisconsin: Species inventory, taxonomic keys, distributions, and natural histories.
Nadine L. Kriska, 445 Russell Labs, 1630 Linden Drive, University of Wisconsin-Madison, Madison, WI, 53706
- 2:15 067 A generic level revision of the Macroductylini (Coleoptera: Scarabaeidae, Melolonthinae).
Kerry Katovich, 445 Russell Labs, 1630 Linden Drive, University of Wisconsin-Madison, Madison, WI, 53706
- 2:35 068 The sap and short-winged flower beetles (Coleoptera: Nitidulidae and Kateretidae) of Wisconsin.
Michele B. Price, Rm. 445, Russell Labs, 1630 Linden Dr., University of Wisconsin - Madison, Madison, WI, 53706
- 2:55-3:15 Break**
- 3:15 069 The tumbling flower beetles (Coleoptera: Mordellidae) of Wisconsin: A faunistic survey in progress.
Anneke E. Lisberg, 445 Russell Labs, 1630 Linden Dr., University of Wisconsin, Madison, WI, 53706
- 3:35 070 The Lamiinae (Coleoptera: Cerambycidae) of Wisconsin: Survey approach and current status.
Krista L. Lambrecht, 538 West Main St. #206, University of Wisconsin-Madison, Madison, WI, 53703
- 3:55 071 Partitioning species diversity across scales: Insights into local and regional patterns of forest insect biodiversity.
Thomas O. Crist, Department of Zoology, Miami University, Oxford, OH, 45056
- 4:15 072 Midwest Mutillidae: A preliminary survey of the velvet ants of Wisconsin.
Craig M. Brabant, 445 Russell Labs, 1630 Linden Drive, University of Wisconsin-Madison, Madison, WI, 53706

- 4:35 073 Airplanes, sand dunes, and moths (Insecta: Lepidoptera).
Eric Metzler, 1241 Kildale Square North, Columbus, OH, 43229
- 4:55 074 An introduction to the milkweed fauna of Wisconsin.
Andrew H. Williams, 445 Russell Labs, 1630 Linden Dr., Department of Entomology, University of Wisconsin, Madison, WI, 53706

March 25, 2002
Monday Afternoon

Submitted Papers
Sections A, B & C
1:30 - 4:45 PM
Room 106

Moderator: W. Wyatt Hoback
Department of Biology
University of Nebraska-Kearney
Kearney, NE 68849

- 1:30 075 Systematics of Eastern Hemisphere Micronectinae (Heteroptera: Corixidae): A progress report on studies in the Indomalaysian and Oceania realms.
Paul P. Tinerella and David A. Rider, 202 Hultz Hall, University Station, North Dakota State University, Fargo, ND, 58105
- 1:42 076 Differential counts within novel-association host-parasitoid combinations.
Marianne Alleyne, 607 E. Peabody Drive, Illinois Natural History Survey, Champaign, IL, 61820, James B. Nardi, Department of Entomology, 320 Morrill Hall, University of Illinois at Urbana-Champaign, Urbana, IL, 61801, Robert N. Wiedenmann, 607 E. Peabody Drive, Illinois Natural History Survey, Champaign, IL, 61820

- 1:54 077 A general, bottom-up model for predicting outcomes in classical biological control of insect pests.
Paul Gross, 2840 Sheridan Road, National-Louis University, Evanston, IL, 60201, Bradford A. Hawkins, Department of Ecology and Evolutionary Biology, University of California-Irvine, Irvine, CA, 92697, Howard V. Cornell, Department of Biological Sciences, University of Delaware, Newark, DE, 19716, Balakrishna Hosmane, Department of Statistics, Northern Illinois University, DeKalb, IL, 60115
- 2:06 078 Conservation biological control of pine needle scale (Homoptera: Diaspididae) in Christmas tree plantations.
Peter F. Reagel and Lawrence M. Hanks, 320 Morrill Hall 505, South Goodwin Ave., University of Illinois at Urbana-Champaign, Urbana, IL, 61801
- 2:18 079 Biological control of purple loosestrife (*Lythrum salicaria* L.) in Michigan.
Douglas A. Landis, Donald C. Sebolt and Michael Klepinger, 334 Natural Resources Building, Michigan State University, East Lansing, MI, 48824
- 2:30 080 Cost-effective crop oil can reduce PVY spread in seed potatoes.
Robert A. Suranyi, Matthew W. Carroll, David W. Ragsdale, Edward B. Radcliffe and Ian V. MacRae, 219 Hodson Hall, 1980 Folwell Ave., University of Minnesota, St. Paul, MN, 55108
- 2:42 081 Advances in factors responsible for host plant resistance in elms (*Ulmus* spp.) for defoliating insect pests.
Fredric D. Miller, 1215 Houbolt Road, Joliet Junior College, Joliet, IL, 60431, George Ware, 4100 Illinois Route 53, The Morton Arboretum, Lisle, IL, 60532

- 2:54 082 Distribution and behavior of the multicolored Asian lady beetle, *Harmonia axyridis* (Pallas).
Mark E. Headings, 1328 Dover Road, The Ohio State University, Agric. Tech. Institute, Wooster, OH, 44691
- 3:06-3:21 Break**
- 3:21 083 Remotely sensing potential overwintering habitat of the soybean aphid, *Aphis glycines* (Homoptera: Aphididae).
Ian V. MacRae, Robert Venette and Matthew Carroll, Dept. of Entomology, 219 Hodson Hall, 1980 Folwell Ave., University of Minnesota, St. Paul, MN, 55108
- 3:33 084 Visual and chemical factors influencing oviposition by *Anopheles gambiae*.
Alicia S. King, Department of Entomology, 243 Natural Science Building, Center for Integrated Plant Systems, Michigan State University, East Lansing, MI, 48824, James R. Miller, Department of Entomology, 203 Center for Integrated Plant Systems, Center for Integrated Plant Systems, Michigan State University, East Lansing, MI, 48824, Edward D. Walker, Department of Entomology, 243 Natural Science Building, Center for Integrated Plant Systems, Michigan State University, East Lansing, MI, 48824
- 3:45 085 A laboratory exercise to teach students about microbial pesticides and nontarget effects.
Julie J. Shaffer and W. Wyatt Hoback, 905 W. 25th, University of Nebraska at Kearney, Kearney, NE, 68849
- 3:57 086 Effects of elevated CO₂ across three trophic levels.
David N. Karowe, 3155 Wood Hall, Western Michigan University, Kalamazoo, MI, 49008
- 4:09 087 Patterns in the magnitude of stream insect drift: A meta-analysis.
Steven L. Kohler, 3938 Wood Hall, Western Michigan University, Kalamazoo, MI, 49008

- 4:21 088 Venereal transmission of mites influences mating behavior in a hunting wasp.
David P. Cowan, Department of Biological Sciences, Western Michigan University, Kalamazoo, MI, 49008
- 4:33 089 Single-locus complementary sex determination in the solitary wasp, *Euodynerus foraminatus*.
Julie K. Stahlhut and David P. Cowan, Biological Sciences, Wood Hall, 1903 W. Michigan Ave., Western Michigan University, Kalamazoo, MI, 49008
- 4:45 090 Effects of *Wolbachia* on host evolutionary genetics.
David D. Shoemaker and Caroline Militzer, 3149 Wood Hall, Department of Biological Sciences, Western Michigan University, Kalamazoo, MI, 49008, John Jaenike, Department of Biology, University of Rochester, Rochester, NY, 14627
- 4:57 091 Effect of plant chemical defense on gregarious larvae of the milkweed specialist *Euchetes egle*.
Stephen B. Malcolm and Betsy Goodrich, 3151 Wood Hall, Dept. Biological Sciences, Western Michigan University, Kalamazoo, MI, 49008, David Ruff II, Dept. Biological Sciences, Oakwood College, Huntsville, AL, 35896

March 25, 2002
Monday Afternoon

Submitted Posters
Student Competition
Ph.D., M.S. and Undergraduate

All Sections
1:30 PM - 9:00 PM
(Authors present 4:00 - 5:00 PM)
Big Ten Room A

- D092 Genetic variation in native and introduced populations of soybean aphid.
Erin Hodgson, Carrie Casmey, Alex Helm, Susan Weller and David Ragsdale, 219 Hodson, 1980 Folwell Ave., University of Minnesota, St. Paul, MN, 55108
- D093 The aquatic and semiaquatic true bugs (Heteroptera: Gerromorpha, Nepomorpha, and Leptopodomorpha) of North Dakota.
Paul P. Tinerella, 202 Hultz Hall, University Station, North Dakota State University, Fargo, ND, 58105
- D094 Changes in midgut proteinase activity of European corn borer (Lepidoptera: Crambidae) resistant to *Bacillus thuringiensis* toxin.
Hua Rong Li, Department of Entomology, Kansas State University, Manhattan, KS, 66506, Brenda Oppert, 1515 College Avenue, Grain Marketing and Production Research Center, USDA-ARS, Manhattan, KS, 66502, Randall A. Higgins, Fangneng Huang and Lawrent L. Buschman, Department of Entomology, Kansas State University, Manhattan, KS, 66506
- D095 Corn pollen expressing the coleopteran-specific Cry3Bb toxin does not affect the fitness of *Coleomegilla maculata*.
Jonathan G. Lundgren, 320 Morrill Hall, 505 S. Goodwin Avenue, University of Illinois, Urbana, IL, 61802, Robert N. Wiedenmann, 607 East Peabody Drive, Illinois Natural History Survey, Champaign, IL, 61820

- D096 Potential North American range for an invasive exotic coccinellid.
Robert L. Koch, Robert C. Venette and William D. Hutchison, 219 Hodson Hall, 1980 Folwell Ave., University of Minnesota, St. Paul, MN, 55108
- D097 Spatial variation in species diversity and composition of forest Lepidoptera: Patterns and implications for conservation.
Keith S. Summerville, Department of Zoology, Miami University, Oxford, OH, 45056, Michael J. Boulware, 2101 East River Terrace, Minneapolis, MN, 55414, Joseph A. Veech and Thomas O. Crist, Department of Zoology, Miami University, Oxford, OH, 45056
- D098 What role does the phenological asynchrony of corn and soybean development play in the egg-laying behavior of the western corn rootworm variant in east central Illinois?
Christopher M. Pierce and Michael E. Gray, Department of Crop Sciences, S-318 Turner Hall, MC-046; 1102 S. Goodwin Avenue, University of Illinois, Urbana, IL, 61801
- D099 Biodiversity of nocturnal Cerambycidae in a hardwood forest.
Jeffrey D. Bradshaw and Marlin E. Rice, 110 Insectary, Iowa State University, Ames, IA, 50010
- D100 Impact of weeds and crop residues on black cutworm damage in Ontario no-till corn fields.
Sigrun A. Kullik, Arthur W. Schaafsma and Mark K. Sears, Bovey Building, University of Guelph, Guelph, ON, N1G 2W1
- D101 Effect of transgenic corn for corn rootworm control on nontarget microarthropods and nematodes.
Mohammad A. Al-Deeb and Gerald E. Wilde, 123 Waters Hall, Kansas State University, Manhattan, KS, 66506

- D102 Comparison of chlorophyll and carotenoid contents in 'Betta' wheat isolines.
Tulio B. Macedo and Tiffany M. Heng-Moss, 202 Plant Industry Building, Department of Entomology, University of Nebraska-Lincoln, Lincoln, NE, 68583, Xinzhi Ni, Department of Entomology, Montana State University, Bozeman, MT, 59717, John P. Markwell and Frederick P. Baxendale, 202 Plant Industry Building, Department of Entomology, University of Nebraska-Lincoln, Lincoln, NE, 68583, Sharron S. Quisenberry, Department of Entomology, Montana State University, Bozeman, MT, 59717
- D103 Effect of cultural practices on Japanese beetle in Michigan blueberries.
Zsofia Szendrei, Nikhil Mallampalli and Rufus Isaacs, 201 CIPS, Michigan State University, East Lansing, MI, 48824
- D104 Seasonal variation of nepetalactone isomers found in catnip, *Nepeta cataria*.
Gretchen E. Schultz, Department of Entomology, 115 Insectary, Iowa State University, Ames, IL, 50010, Chris Peterson, 101 Forestry Sciences Lab, 201 Lincoln Green, USDA Forest Service, Starkville, MS, 39759, Jason B. Belden and Joel Coats, Department of Entomology, 116 Insectary, Iowa State University, Ames, IA, 50011
- D105 Characterization of Bt resistance inheritance in *Ostrinia nubilalis*.
Analiza P. Alves, Blair D. Siegfried and Terence Spencer, 202 Plant Industry, Department of Entomology, University of Nebraska-Lincoln, Lincoln, NE, 68583-0816
- D106 Detection and quantification of fluvalinate resistance in *Varroa* mites in Nebraska.
Paula A. Macedo, Marion D. Ellis and Blair D. Siegfried, 202 Plant Industry Bldg, University of Nebraska-Lincoln, Lincoln, NE, 68583

- D107 White-lined sphinx (*Hyles lineata*) host range tests reveal specificity to purple loosestrife (*Lythrum salicaria*) compared to crops and native hosts.
Brian C. Peterson and Harold Nagel, 905 W. 25th Street, University of Nebraska at Kearney, Kearney, NE, 68849
- D108 New host plant and vector relationships for BPMV.
Brent J. Werner, Rayda K. Krell and Larry P. Pedigo, 117 Insectary, Iowa State University, Ames, IA, 50011
- D109 Comparative toxicities of three insecticides to the soybean stem borer, *Dectes texanus texanus* (Coleoptera, Cerambycidae) adults.
Michelle Kaczmarek, Kun Yan Zhu, Randy Higgins and Phil Sloderbeck, 1415 Normandy Pl, Apt 118, Kansas State University, Manhattan, KS, 66502
- D110 The effects of artificial light on carrion beetles, Coleoptera: Silphidae.
Jonathan Doyle, P.O. Box 500, University of Nebraska at Kearney, Kyle, SD, 57752, Daniel G. Sneath, RR 3, Box 67, University of Nebraska-Lincoln, Colome, SD, 57528, W. Wyatt Hoback, 905 W. 25th Street, University of Nebraska at Kearney, Kearney, NE, 68849
- D111 Dark feeding by *Cicindela fulgida* (Coleoptera: Cicindelidae) reveals use of alternative senses by a visual predator.
John J. Riggins and W. Wyatt Hoback, 905 W. 25th Street, University of Nebraska at Kearney, Kearney, NE, 68849

- D112 Improved method for assaying transgenic pollen effects on *Ostrinia nubilalis* larvae.
Kate T. Kronback, Genetics Laboratory c/o Insectary, Iowa State University, USDA, ARS Corn Insects and Crop Genetics Research Unit, Ames, IA, 50011, Patricia L. Anderson, Iowa State University, Department of Entomology, 118 Genetics Laboratory, Ames, IA, 50011, Richard L. Hellmich, Jeanette M. Dyer and Leslie C. Lewis, Genetics Laboratory c/o Insectary, Iowa State University, USDA, ARS Corn Insects and Crop Genetics Research Unit, Ames, IA, 50011
- D113 Microhabitat preference of the dominant members of the coccinellid complex in an agricultural landscape.
Charles H. McKeown, Manuel Colunga-Garcia and Stuart Gage, 235 Natural Science, Michigan State University, E. Lansing, MI, 48824
- D114 Temporal niche separation in two exotic coccinellids.
Charles H. McKeown, Manuel Colunga-Garcia and Stuart Gage, 931 Horton, Michigan State University, E. Lansing, MI, 48824
- D115 Bacterial inhibition by carrion beetle secretions track phylogenetic relationships.
Randall L. Goldfish, W. Wyatt Hoback and Julie J. Shaffer, 905 W. 25th, University of Nebraska at Kearney, Kearney, NE, 68849
- D116 Evaluation of some surface-active agents for their synergistic/additive effects on the efficacy of *Beauveria bassiana* against *Tribolium castaneum*.
Waseem Akbar, 1605 Roof Dr. 31, Kansas State University, Manhattan, KS, 66502, Jeff Lord, 1515 College Avenue, USGMPRC, Manhattan, KS, 66502, James Nechols, Dept. of Entomology, Kansas State University, Manhattan, KS, 66502

- D117 A comparison of sampling methods for integrated pest management of insects associated with potato.
Kurt Olmer, Jesse R. Ziems and W. Wyatt Hoback, 905 W. 25th Street, University of Nebraska at Kearney, Kearney, NE, 68849
- D118 Tolerance of Croatian commercial corn hybrids to larval feeding and damage by corn rootworm (Coleoptera: Chrysomelidae).
Stephanie N. Miller, SPO 1571, Luther College, 700 College Dr., Luther College, Decorah, IA, 52101
- D119 Growth and yield for conventional and added-value soybeans experiencing multiple defoliation.
Rodney A. Madsen, Thomas E. Hunt and Leon G. Higley, Dept. of Entomology, University of Nebraska-Lincoln, Lincoln, NE, 68583-0816
- D120 Soybean aphid (*Aphis glycines*) survival and fecundity when feeding on dry bean.
Kaci J. Agle and Chris Difonzo, B18 National Food Safety & Toxicology Building, Michigan State University, East Lansing, MI, 48823
- D121 Tarnished plant bug management in June-bearing strawberries.
Suzanne J. Wold, William D. Hutchison and Eric C. Burkness, Department of Entomology, 219 Hodson Hall, 1980 Folwell Avenue, University of Minnesota, St. Paul, MN, 55108
- D122 Grass hosts of the chinch bug, *Blissus occiduus*.
Thomas E. Eickhoff, Frederick P. Baxendale and Terrance P. Riordan, 202 Plant Industry Building, University of Nebraska-Lincoln, Lincoln, NE, 68583
- D123 Influence of buffalograss management practices on the chinch bug, *Blissus occiduus* (Barber), and its natural enemies.
Jeffrey D. Carstens, Frederick P. Baxendale and Tiffany M. Heng-Moss, 202 Plant Industry Building, University of Nebraska-Lincoln, Lincoln, NE, 68583

- D124 Extended repellency of catnip and osage orange fruit to the American cockroach.
Erica J. Simbro and Joel R. Coats, 112
Insectary, Iowa State University, Ames, IA,
50014
- D125 Invasion of Lyme disease into southwest Michigan: A regional risk assessment.
Erik S. Foster, Edward D. Walker and William T. Morgan, Department of Entomology,
Michigan State University, East Lansing, MI,
48824, Marta A. Guerra, Special Pathogens
Branch, Centers for Disease Control and
Prevention, Atlanta, GA, Uriel Kitron, College
of Veterinary Medicine, Department of
Veterinary Pathobiology, University of Illinois,
Urbana, IL, 61801

March 25, 2002
Monday Afternoon

Submitted Posters

All Sections

1:30 - 9:00 PM

(Authors present 4:00 - 5:00 PM)

Big Ten Room A

- D126 Effects of salinity and pH on life-history parameters of larval *Aedes* mosquitoes (Insecta: Diptera).
Thomas M. Clark and Benjamin J. Flis, 1700
Mishawaka Ave., Indiana University, South Bend,
IN, 46634, Susanna K. Remold, Michigan State
University, E. Lansing, MI, 48824
- D127 Physiological aspects of the broad pH tolerance of larval *Aedes aegypti* (Insecta: Diptera).
Thomas M. Clark and Benjamin J. Flis, 1700
Mishawaka Ave., Indiana University, South
Bend, IN, 46634

- D128 Alternative splicing of the *para* gene generates functionally and pharmacologically distinct sodium channels.
Jianguo Tan, Zhiqi Liu and Yoshiko Nomura, 106 CIPS, Department of Entomology, Michigan State University, East Lansing, MI, 48824, Alan M. Goldin, Department of Microbiology and Molecular Genetics, University of California, Irvine, CA, 92697, Ke Dong, 106 CIPS, Department of Entomology, Michigan State University, East Lansing, MI, 48824
- D129 Sodium channel mutations and pyrethroid resistance.
Jianguo Tan and Zhiqi Liu, Department of Entomology, 106 CIPS, Michigan State University, East Lansing, MI, 48824, Steven M. Valles, Center for Medical, Agricultural and Veterinary Entomology, 1600 SW 23rd Dr., USDA-ARS, Gainesville, FL, 32608, Alan L. Goldin, Department of Microbiology and Molecular Genetics, 240 Medical Science Building B, University of California, Irvine, CA, 92697, Ke Dong, Department of Entomology, 106 CIPS, Michigan State University, East Lansing, MI, 48824
- D130 Survey of Asian longhorned beetle natural enemies in China and North America.
Leah S. Bauer, 1407 S. Harrison Rd., 220 Nisbet Building, USDA Forest Service and Michigan State University, E. Lansing, MI, 48823, Houping Liu, Center for Integrated Plant Systems, Michigan State University, E. Lansing, MI, 48824, Deborah L. Miller, 1407 S. Harrison Rd., 220 Nisbet Building, USDA Forest Service and Michigan State University, E. Lansing, MI, 48823
- D131 Soybean aphid in Indiana.
Claire E. Rutledge and Robert J. O'Neil, 102 Smith Hall, Purdue University, Lafayette, IN, 47907

- D132 Corn flea beetle populations and Stewart's wilt in sweet corn in Illinois in 2001.
Kelly A. Cook, Jerald K. Pataky and Richard A. Weinzierl, Turner Hall, 1102 S. Goodwin Avenue, University of Illinois, Urbana, IL, 61801
- D133 Comparison of community structure of arboreal caterpillars (Lepidoptera) in four tree species of the eastern deciduous forest.
Jonathan K. Kahn, Keith S. Summerville and Thomas O. Crist, Department of Zoology, Miami University, Oxford, OH, 45056, Jon C. Gering, Division of Sciences, Truman State University, Kirksville, MO, 63501
- D134 Chemical ecology of *Oryzaephilus surinamensis* (L). (Coleoptera: Silvanidae) mating behavior and response to food.
Gurunanth M. Suryavanshi and Damon J. Crook, 123 Waters Hall, Kansas State University, Manhattan, KS, 66506, James F. Campbell, 1515 College Ave., USDA ARS, Grain Marketing and Production Research Center, Manhattan, KS, 66502, Sonny B. Ramaswamy, 123 Waters Hall, Kansas State University, Manhattan, KS, 66506
- D135 Using a GIS to illustrate the spatial and temporal dynamics of adult corn rootworms in the South Dakota areawide management site.
Bryan W. French, 2923 Medary Ave., USDA, ARS, NGIRL, Brookings, SD, 57006, Laurence D. Chandler, 1307 N. 18th Street, USDA, ARS, RRVARC, Fargo, ND, 58105, Amber A. Beckler and Dave A. Beck, 2923 Medary Ave., USDA, ARS, NGIRL, Brookings, SD, 57006
- D136 Dispersal of northern and western corn rootworms in relation to sex, size, and reproductive status in the South Dakota areawide management site.
Bryan W. French, 2923 Medary Ave., USDA, ARS, NGIRL, Brookings, SD, 57006, Laurence D. Chandler, 1307 N. 18th Street, USDA, ARS, RRVARC, Fargo, ND, 58105, Leslie Hammack and Dave A. Beck, 2923 Medary Ave., USDA, ARS, NGIRL, Brookings, SD, 57006

- D137 Use of transgenic plants to measure insect herbivore movement.
Joseph L. Spencer, Center for Economic Entomology, Natural Resources Bldg, 607 E. Peabody Drive, Champaign, IL, 61820-6917, Timothy R. Mabry, University of Illinois, Department of Crop Sciences, Urbana, IL, 61801, Ty T. Vaughn, 700 Chesterfield Parkway North, Monsanto Company, St. Louis, MO, 63198
- D138 Ground beetle occurrence in rotated fields of Bt corn and soybean in the South Dakota corn rootworm areawide management site.
Bryan W. French, 2923 Medary Ave., USDA, ARS, NGIRL, Brookings, SD, 57006, Laurence D. Chandler, 1307 N. 18th Street, USDA, ARS, RRVARC, Fargo, ND, 58105, Dave A. Beck and Michael M. Ellsbury, 2923 Medary Ave., USDA, ARS, NGIRL, Brookings, SD, 57006
- D139 Community structure of soil microarthropods on decomposing Bt- and non-Bt corn residues.
Edmond R. Zaborski, 607 E. Peabody Drive, Illinois Natural History Survey, Champaign, IL, 61821
- D140 Insect ecology and evolution at Western Michigan University.
David N. Karowe, 3155 Wood Hall, Western Michigan University, Kalamazoo, MI, 49008
- D141 Modeling insect dispersal in the landscape.
Liyang Zhou, Beth Bishop, Walter Pett and Edward Grafius, 243 Natural Science Building, Dept. of Entomology, Michigan State University, E. Lansing, MI, 48824
- D142 Pesticides from the past: Using old pesticide containers in teaching and extension.
Chris D. DiFonzo, B18 FSTB, Pesticide Education Program Office, Michigan State University, East Lansing, MI, 48824

- D143 Children learn about pesticide safety in the classroom and at an airport.
Rebecca Thompson, B18 Food Safety and Tox., Michigan State University, East Lansing, MI, 48824, Bruce MacKellar, Michigan State University Extension, Paw Paw, MI, Erica Jenkins, Michigan State University, East Lansing, MI, Rich Hodupp, Michigan State University Extension, Ithaca, MI, Chris DiFonzo, Michigan State University, East Lansing, MI
- D144 Farmer's concerns and perceptions of biotechnology for the corn rootworm.
Ted A. Wilson, Marlin E. Rice and Jon J. Tollefson, 17 Insectary, Iowa State University, Ames, IA, 50011
- D145 The soybean aphid in Iowa: Observations from 2001.
Brian Lang, 911 S. Mill St., Iowa State University Extension, Decorah, IA, 52101, Marlin E. Rice, 103 Insectary, Iowa State University, Ames, IA, 50011
- D146 The effects of high intensity winter grazing of corn residue on the European corn borer.
Mark W. Hoard, 4112 North Water Tower Place, University of Illinois, Mt. Vernon, IL, 62864
- D147 Using synchronous and asynchronous distance learning to teach entomology.
Barbara A. Nead-Nylander, William M. Hendrix and Larry L. Larson, 9330 Zionsville Road, Indianapolis, IN, 46268
- D148 The multicolored Asian lady beetle (*Harmonia axyridis*) as a nuisance pest in households throughout Ohio.
Bruce Eisley, Margaret F. Huelsman, Joe Kovach, Jim Jasinski and Curtis E. Young, 1219 W. Main Cross St., Suite 202, The Ohio State University, Findlay, OH, 45840

- D149 Management of late-season bean leaf beetles in Iowa soybean.
Ken Pecinovsky and Marlin E. Rice, 103 Insectary, Iowa State University, Ames, IA, 50011
- D150 Soybean aphid control and predator preservation.
John R. Hinz, William W. DeWeese, John A. Francis and John D. Wollam, 8400 Corporate Dr., Bayer Corporation, Kansas City, Mo, 64120
- D151 Influence of western corn rootworm larval injury on corn yield.
Robert J. Wright and Terry A. DeVries, P.O. Box 66, University of Nebraska, Clay Center, NE, 68933
- D152 Seasonal emergence of western corn rootworms (Coleoptera: Chrysomelidae) in rotated and continuous cornfields.
Matthew E. O'Neal, 204 CIPS, Michigan State University, East Lansing, MI, 48824, David Meek, 1200 Academy St., Kalamazoo College, Kalamazoo, MI, 49006, Christina DiFonzo and Douglas Landis, 204 CIPS, Michigan State University, East Lansing, MI, 48824
- D153 In-field labeling of western corn rootworm adults with Rubidium.
Bradley T. Niimi, Timothy M. Nowatzki, Blair D. Siegfried, Lance J. Meinke, Thomas E. Hunt and David C. Gosselin, 202 Plant Industry Bldg, University of Nebraska, Lincoln, NE, 68583-0816, Edwin F. Harvey, 113 Nebraska Hall, University of Nebraska-Lincoln, School of Natural Resources, Lincoln, NE, 68583-0517, Kelli Warren, 113 Nebraska Hall, University of Nebraska-Lincoln, School of Natural Resources, Lincoln, NE, 68583-0517

- D154 Evaluating the impact of transgenic corn hybrids developed for insect control on non-target organisms.
Laura S. Higgins and Deanne L. Wright, 7250 NW 62nd Ave., Pioneer Hi-Bred International, Inc., Johnston, IA, 50131
- D155 Assessment of western corn rootworm survival, biology, and emergence when presented a leading transgenic event alone and in combination with selected grassy cornfield weeds.
Thomas L. Clark and Bruce E. Hibbard, Department of Entomology, 1-87 Agriculture Building, University of Missouri, Columbia, MO, 65211
- D156 Development and validation of models predicting the occurrence and spread of organophosphate resistance in Nebraska western corn rootworm populations.
Michael A. Caprio, Department of Entomology, PO Box 9775, Mississippi State University, Starkville, MS, 39762-9775, Timothy M. Nowatzki, Blair D. Siegfried, Lance J. Meinke and Robert J. Wright, 202 Plant Industry Building, University of Nebraska-Lincoln, Lincoln, NE, 68583-0816, Laurence D. Chandler, PO Box 5677, University Station, USDA ARS RRVARC, Fargo, ND, 58105-5677
- D157 Development of western corn rootworm resistance to PennCap-M and effects on management: Survey of crop consultants from the Phelps County, Nebraska area.
Timothy M. Nowatzki, Robert J. Wright, Blair D. Siegfried and Lance J. Meinke, 202 Plant Industry Building, Dept. of Entomology, University of Nebraska-Lincoln, Lincoln, NE, 68583-0816, Michael A. Caprio, PO Box 9775, Dept. of Entomology, Mississippi State University, Starkville, MS, 39762-9775, Laurence D. Chandler, PO Box 5677, University Station, USDA ARS RRVARC, Fargo, ND, 58105-5677

- D158 Development and maintenance of European corn borer (Lepidoptera: Crambidae) resistance to *Bacillus thuringiensis* Cry9C protein in the lab.
Mitch Meehan and Von Kaster, 2369 330th Street, Garst Seed Company, Slater, IA, 50244, Jon Fischer, 5315 Indigo Way, Aventis Crop Science, Middleton, WI, 53562
- D159 Effect of mulch and chemical treatments on population densities of striped cucumber beetle (Coleoptera: Chrysomelidae), percentages of bacterial wilt, and yield in early-planted muskmelons.
Wai-Ki F. Lam, Rick E. Foster and Sara L. Barber, 4369 North Purdue Road, Southwest Purdue Agricultural Program, Purdue University, Vincennes, IN, 47591
- D160 pH and its effects on key new insecticide formulations: Potential guidelines for the field.
Larry L. Larson, Margaret S. Kempe, Bill H. Hendrix and Barb A. Nead-Nylander, 9330 Zionsville Rd., Dow AgroSciences, Indianapolis, IN, 46268
- D161 INTREPID* 2F: A Registration and performance update.
Gary D. Thompson, Larry G. Thompson and Jon M. Babcock, 9330 Zionsville Rd, Dow AgroSciences, Indianapolis, IN, 46268
- D162 Proposed changes in the agricultural uses of Lorsban: A North Central perspective.
William H. Hendrix, III and Barb A. Nead-Nylander, 9330 Zionsville Road, Dow AgroSciences, Indianapolis, IN, 46268
- D163 Use of Lorsban 4-E to control the soybean aphid, *Aphis glycines*: A global perspective.
William H. Hendrix, III and Scott C. Ditmarsen, 9330 Zionsville Road, Dow AgroSciences, Indianapolis, IN, 46268, Zhen Wei Yao, Oriental Plaza, No. 1, East Chang An Avenue, Dow AgroSciences China Ltd., Beijing, China, 100738

- D164 Comparison of tebufenozide and methoxyfenozide with broad spectrum insecticides for control of grape berry moth, *Endopiza viteana* (Lepidoptera: Tortricidae). **Keith S. Mason**, Rufus Isaacs and Elly Maxwell, 201 Center for Integrated Plant Systems, Michigan State University, East Lansing, MI, 48824
- D165 Evaluation of systemic insecticides for control of the Asian longhorned beetle. **Therese M. Poland**, Robert A. Haack and Toby R. Petrice, 1407 S. Harrison Rd. Rm. 220, USDA Forest Service, E. Lansing, MI, 48823, RuiTong Gao, Wan Shou Shan, Chinese Academy of Forestry, Beijing, PRC, 100091
- D166 Characterization of protein changes in sorghum challenged by greenbug feeding. **Dana Novak**, Tiffany Heng-Moss, Shauna Bose, Gautam Sarath, Frederick Baxendale and Z B Mayo, 202 Plant Industry, University of Nebraska, Lincoln, NE, 68583
- D167 Insect pest response to glucosinolate-rich varieties of broccoli and cabbage in Illinois. **Catherine E. Eastman**, 172 Natural Resources, 607 E. Peabody, Illinois Natural History Survey, Champaign, IL, 61820, John B. Masiunas, Mosbah M. Kushad and Elizabeth A. Wahle, 260 E.R. Madigan Laboratory, 1201 West Gregory Drive, University of Illinois at Urbana-Champaign, Dept. of Natural Resources and Environmental Sciences, Urbana, IL, 61801

March 25, 2002
Monday Evening

Linnaean Games

6:30 - 8:30 PM

Gamesmaster: Marlin Rice

Big Ten Room A

Student Affairs Committee

Student Recruitment and Employment Mixer

8:30 - 10:30 PM

Big Ten Room B

March 26, 2002
Tuesday Morning

Registration

7:30 AM - 5:00 PM

Big Ten Room A

Insect Photo Salon

6:45 - 8:00 AM

Host: Phil Sloderbeck

Room 106

Poster Session

8:00 AM - 4:30 PM

(Authors present 3:30 - 4:30 PM)

Big Ten Room A

March 26, 2002

Tuesday Morning

Symposium

Organic Fruit Production

8:00 - Noon

Auditorium

Organizers and Moderators

Mark Whalon and Rufus Isaacs

Department of Entomology

Michigan State University

East Lansing, MI 48824

- 8:00 168 Introduction and opening remarks.
Mark Whalon, Department of Entomology,
Michigan State University, East Lansing, MI,
48824
- 8:10 169 Evaluation of organic pest management tools.
Rick E. Foster, 1158 Smith Hall, Purdue
University, W. Lafayette, IN, 47907
- 8:30 170 Organic insect management practices in Iowa.
Kathleen Delate and Heather Friedrich, Depts.
of Horticulture & Agronomy, 106 Horticulture
Hall, Iowa State University, Ames, IA, 50011
- 8:50 171 Organic tea project at Michigan State
University.
Mark Whalon, Department of Entomology,
Michigan State University, East Lansing, MI,
48824
- 9:10 172 Pheromone disruption and organic tree fruit
production in the Midwest.
Larry Gut, Department of Entomology,
Michigan State University, East Lansing, MI,
48824
- 9:30 173 Use of particle film technology for fruit insect
pest management in Michigan.
John C. Wise, 205 CIPS, Michigan State
University, East Lansing, MI, 48824

9:50-10:20 Break

- 10:20 174 Enhancing soil quality to optimize beneficial nematode community structure in Michigan fruit orchards.
George Bird, Department of Entomology, Michigan State University, East Lansing, MI, 48824
- 10:40 175 A companion planting approach to stable organic pest management.
Mark W. Brown and Clarissa R. Mathews, 45 Wiltshire Road, USDA, ARS, Kearneysville, WV, 25430
- 11:00 176 Efforts to foster organic production for processing in the Midwest.
John M. Aselage, Gerber Products Company, PO Box 10010, Ft. Smith, AR, 72917-0010
- 11:20 177 Organic consultants and growers panel discussion.
Mark Whalon, Department of Entomology, Michigan State University, East Lansing, MI, 48824

March 26, 2002

Tuesday Morning

Symposium

Bt Corn and Corn Insects: Current Issues

8:30 - Noon

Lincoln Room

Organizers and Moderators

Thomas Hunt

University of Nebraska
Haskell Agricultural Lab
Concord, NE 68728

and

Rick Hellmich

USDA, ARS Corn Insects &
Crop Genetics Research Unit
Genetics Lab c/o Insectary
Department of Entomology
Iowa State University
Ames, Iowa 50011

- 8:30 178 Introduction: Past, current, and emerging issues associated with Bt corn.
Thomas E. Hunt, Haskell Agricultural Laboratory, 57905 866 Road, University of Nebraska, Concord, NE, 68728
- 8:45 179 Summary of Bt corn and monarch butterfly research: Where do we go from here?
Richard L. Hellmich, Genetics Laboratory, Insectary, USDA ARS Corn Insects and Crop Genetics Research Unit, Department of Entomology, Ames, IA, 50011
- 9:10 180 IRM in areas of frequent insecticide use.
Thomas E. Hunt, 57905 866 Road, University of Nebraska, Concord, NE, 68728, Randall Higgins, Lawrent Buschman and Phillip Sloderbeck, 4000 E. Mary St., Kansas State University, Garden City, KS, 67846
- 9:35 181 Monitoring susceptibility: Current issues.
Blair D. Siegfried, Department of Entomology, 202 Plant Industry Bldg., University of Nebraska, Lincoln, NE, 68583
- 10:00 182 Combining ECB and CRW resistance: A challenge for IRM.
Kenneth R. Ostlie, Department of Entomology, 219 Hodson Hall, 1980 Folwell Ave., University of Minnesota, St. Paul, MN, 55108
- 10:25-10:45 Break**
- 10:45 183 Corn rootworm transgenics and non-targets.
Graham P. Head, Monsanto Company, GG3A, 700 Chesterfield Parkway, St. Louis, MO, 63198
- 11:10 184 Bt corn after 5 years of commercial use: A grower's perspective.
Jeff King, 1728 E. 3rd St., Fremont, NE, 68025
- 11:35 185 What have we learned and what is next: An industry perspective.
Eric S. Sachs, Monsanto Company, 700 Chesterfield Parkway, Monsanto Company, St. Louis, MO, 63198

March 26, 2002

Tuesday Morning

“Get Bugged” Insect Exposition

10:00 - Noon

Big Ten Room A

March 26, 2002

Tuesday Afternoon

Symposium

Biology and Management of Beetles

in Fruit Crops

1:00 - 4:45 PM

Auditorium

Organizers and Moderators

Rufus Isaacs and Mark Whalon

Department of Entomology

Michigan State University

East Lansing, MI 48824

- | | | |
|------|-----|---|
| 1:00 | 186 | Beetles as fruit pests - a global perspective.
Michael G. Klein , 1680 Madison Ave.,
OARDC, USDA/ARS, Wooster, OH, 44691 |
| 1:30 | 187 | Using electrophysiology to explore beetle
olfaction.
Allard A. Cossé , 1815 N. University Street,
USDA/ARS/NCAUR, Peoria, IL, 61604 |
| 1:50 | 188 | Managing the rose chafer with an attractant.
Roger N. Williams , 1680 Madison Ave., The
Ohio State University, Wooster, OH, 44691 |

- 2:10 189 Novel approaches to managing plum curculio.
Mark Whalon, Department of Entomology,
Michigan State University, East Lansing, MI,
48824
- 2:30 190 Nematodes for weevil control in strawberries.
Richard S. Cowles, P. O. Box 248, 153 Cook
Hill Rd., Connecticut Agricultural Experiment
Station, Windsor, CT, 06095
- 2:50-3:15 Break**
- 3:15 191 Gregarine pathogens of scarab pests: a new
class of natural enemy?
David L. Cappaert and David R. Smitley,
Dept. of Entomology, Natural Science Bldg,
Michigan State University, East Lansing, MI,
48824
- 3:35 192 Establishing grub predators and parasites in
Michigan.
Dave Smitley, Department of Entomology,
Michigan State University, East Lansing, MI,
48824
- 3:55 193 Reduced-risk approaches to Japanese beetle
control in small fruit crops.
Rufus Isaacs and Zsofia Szendrei, 201 CIPS,
Michigan State University, East Lansing, MI,
MI 48824
- 4:15 194 Evaluating performance of new beetle
insecticides.
John Wise, Department of Entomology,
Michigan State University, East Lansing, MI,
48824
- 4:35 195 Closing remarks.
Rufus Isaacs, Department of Entomology,
Michigan State University, East Lansing, MI,
48824

March 26, 2002
Tuesday Afternoon

Symposium

**Extension Entomology: Current Issues in
Technology, Graduate Education and Partnerships**

1:30 - 4:35 PM
Lincoln Room

Organizers and Moderators

Robert J. Wright

University of Nebraska
South Central Research & Extension Center
Clay Center, NE 68933-0066

and

Phil Sloderbeck

Kansas State University
Southwest Area Extension Office
4000 E. Mary St.
Garden City, KS 67846

- 1:30 196 Introduction and overview.
Robert J. Wright, South Central Research &
Extension Center, University of Nebraska, Clay
Center, NE, 68933
- 1:35 197 Use of the internet in extension program delivery.
Phillip E. Sloderbeck and Randall A. Higgins,
Department of Entomology, 239 Waters Hall,
Kansas State University, Manhattan, KS,
66506-4027
- 1:55 198 Use of the internet in distance diagnosis of pest
problems.
Randall A. Higgins, Phillip Sloderbeck, and
Bobby Brown, Department of Entomology, 239
Waters Hall, Kansas State University, Manhattan,
KS, 66506-4027; Will Baldwin, Judy O'Mara,
Joy Pierzynski, Doug Jardine, C. Marr,
W. Upham, D. Buchholz, and R. Terry,
Departments of Communications, Plant
Pathology, Horticulture, Forestry, and Recreation
Resources, and Administration.

- 2:15 199 The Soybean Aphid Watch: A regional response.
Susan T. Ratcliffe, 1102 S. Goodwin Avenue,
University of Illinois, Urbana, IL, 61801
- 2:35 200 Graduate training in extension entomology at
Purdue University.
Rick E. Foster, 1158 Smith Hall, Purdue
University, W. Lafayette, IN, 47907
- 2:55 201 Graduate training in extension entomology:
View from a county office.
Barbara P. Ogg, 444 Cherrycreek Rd; Suite A,
University of Nebraska, Lincoln, NE, 68528-1507
- 3:15-3:35 Break**
- 3:35 202 ACORN: A web-based Alternative Control
Outreach Network for master gardeners.
Clifford S. Sadof and Robert J. O'Neil,
Department of Entomology, 1158 Smith Hall,
Purdue University, West Lafayette, IN, 47906-
1158, Robert N. Wiedenmann, 607 E. Peabody
Drive, Illinois Natural History Survey, Center
for Economic Entomology, Champaign, IL,
61820-6917
- 3:55 203 Developing public-private partnerships to
promote biological control of purple loosestrife.
Robert N. Wiedenmann and Susan L. Post,
607 E. Peabody, Illinois Natural History
Survey, Champaign, IL, 61820
- 4:05 204 Collaborative on-farm research...Return to the
extension model.
Andrew P. Christiansen, Chuck A. Burr,
Roger W. Elmore, Terrence A. Hejny and Gary
L. Zoubek, University of Nebraska, P.O. Box
308, Aurora, NE, 68818

March 26, 2002

Tuesday Evening

Student Award Presentations

Presented by: Ian MacRae

6:00 - 6:45 PM

Big Ten Room A

Linnaean Games

6:45 - 7:15 PM

Gamesmaster: Marlin Rice

2002 NCB Champions vs. the "Old Timers"

Big Ten Room A

NCB-ESA Mixer

7:15 - 10:00 PM

Big Ten Room BC

March 27, 2002

Wednesday Morning

Registration

7:30 AM - Noon

Auditorium/Lobby

Continental Breakfast

6:30 - 8:00 AM

Auditorium/Lobby

Final Business Meeting

8:00 - 9:00 AM

Auditorium

March 27, 2002
Wednesday Morning

Student Affairs Committee Symposium
Tubenrope Workshop: An Exercise
in Hypothesis Testing

9:00 - Noon
Room 106

Organizers

James R. Miller and **Matthew E. O'Neal**

Department of Entomology
Michigan State University
East Lansing, MI 48824

March 27, 2002
Wednesday Morning

NCR-125 Symposium
Biological Control in Urban Environments and
Interior Plantscapes

9:00 - Noon
Lincoln Room

Organizer and Moderator

Raymond Cloyd

384 National Soybean Research Laboratory
1101 West Peabody Drive
University of Illinois
Urbana, IL 61801

- | | | |
|------|-----|--|
| 9:00 | 205 | Introduction and opening remarks.
Raymond Cloyd , University of Illinois,
Urbana, IL, 61801 |
| 9:10 | 206 | Conservation biological control in urban
landscapes.
Lawrence Hanks , 505 South Goodwin Ave.,
University of Illinois, Urbana, IL, 61801 |
| 9:40 | 207 | Opportunities for implementing biological
control in conservatories.
Steve Stauffer , 2400 North Stockton Drive,
Lincoln Park Conservatory, Chicago, IL, 60614 |

- 10:10 208 Challenges related to using biological control in greenhouses.
Raymond Cloyd, 384 National Soybean Research Laboratory, 1101 West Peabody Drive, University of Illinois, Urbana, IL, 61801
- 10:40-11:00 Break**
- 11:00 209 Biological control of the Asian longhorned beetle, *Anoplophora glabripennis*.
Leellen Solter, 140 National Soybean Research Laboratory, 1101 West Peabody Drive, Illinois Natural History Survey, Urbana, IL, 61801
- 11:30 210 Effects of imidacloprid treated plants on beneficial organisms.
Vera Krischik, Department of Entomology, 219 Hodson Hall, 1980 Folwell Avenue, University of Minnesota, St. Paul, MN, 55108

March 27, 2002

Wednesday Morning

Submitted Papers

Sections E & F

9:00 - Noon
Auditorium

Moderator: Mark Boetel
Department of Entomology
North Dakota State University
Fargo, ND 58105

- 9:00 211 Evaluation of four insecticide impregnated ear tags for control of horn flies on Nebraska cattle.
John B. Campbell, David J. Boxler and Don C. Adams, 461 West University Dr., University of Nebraska, West Central Research & Extension Center, North Platte, NE, 69101, Terry J. Klopfenstein, Department of Animal Science, University of Nebraska-Lincoln, Lincoln, NE, 68583

- 9:12 212 Efficacy of spinosad (Tracer 4SC) for the control of European and southwestern corn borer in field corn.
Larry G. Thompson, Jon M. Babcock and Gary D. Thompson, 9330 Zionsville Road, Dow AgroSciences, Indianapolis, IN, 46268
- 9:24 213 Zeta-cypermethrin - A new insecticide for major crops.
Kathy A. Leiferman, Keith Evans, Howard Guscar, Robert Hooten, Terry Mize, Brent Neuberger, Robert Perry, Joseph Reed, Gail Stratman and Samuel Tutt, 1735 Market Street, FMC Corporation, Philadelphia, PA, 19103
- 9:36 214 Insecticide use strategies for European corn borer and southwestern corn borer Bt-corn refugia.
Joseph P. Reed, Robert S. Hooten, Howard L. Guscar, Samuel F. Tutt, Gail G. Stratman, Brent A. Neuberger, Galen B. Wilson and Terry W. Mize, POB 214, Seymour, IL, 61875
- 9:48 215 Utilizing sprinkler irrigation to apply bifenthrin for control of western corn rootworm larvae in corn.
Gail G. Stratman, Robert S. Hooten and Terry W. Mize, 7502 Dreyfuss, FMC Ag Products, Amarillo, TX, 79121
- 10:00 216 Consistency of corn rootworm (*Diabrotica* spp.) control using clothianidin seed treatments under a variety of pest pressures.
Michael R. Schwarz, William B. Rose and Christopher K. Niebrugge, 8400 Hawthorn Rd., Bayer Corporation, Kansas City, MO, 64120-0013
- 10:12 217 Control of non-rootworm pests of field corn with clothianidin seed applied insecticide.
Ray P. Knake, 8309 Hammontree, Gustafson LLC, Urbandale, IA, 50322, Bill Hairston, P.O. Box 660065, Dallas, TX, 75266
- 10:24-10:40 Break**

- 10:40 218 Does Cry3Bb transgenic corn play a role in western corn rootworm larval movement?
Bruce E. Hibbard, 109 Curtis Hall, University of Missouri, USDA-ARS, Columbia, MO, 65211-7020, Ty T. Vaughn, 700 Chesterfield Parkway N., Mail Zone GG3E, Monsanto Corporation, Chesterfield, MO, 63198, Thomas L. Clark, 187 Agriculture Bldg, Department of Entomology, University of Missouri, Columbia, MO, 65211
- 10:52 219 Cuphea, a new crop for rotation to control corn rootworm beetles
Robert W. Behle, Terry A. Isbell and Bliss S. Phillips, 1815 N. University St., USDA-ARS, Peoria, IL, 61604-3902
- 11:04 220 Organism resistance to xenobiotics: What do we learn from each other's science
John E. Kaufmann, Philip J. Boeve and Rod Stevenson, 6511 West B Avenue, Monsanto Company, Plainwell, MI, 49080
- 11:16 221 A toolbox for studying mating disruption: Use of aging chambers and gas chromatography to answer specific questions about pheromone longevity and movement
Piera Y. Giroux and James R. Miller, 203 Center for Integrated Plant Systems, Michigan State University, East Lansing, MI, 48824
- 11:28 222 Southwestern corn borer cannibalism and corn stalk girdling: Expressions of competition for the best winter site to survive the winter
Lawrent L. Buschman, Jose G. Guzman, Phillip E. Sloderbeck and Sonny B. Ramaswamy, 123 Waters Hall, Kansas State University, Manhattan, KS, 66506
- 11:40 223 Potatoes in south central Nebraska tolerate high levels of artificial mid-season defoliation
W. Wyatt Hoback and Jesse R. Ziems, Department of Biology, 905 W. 25th Street, University of Nebraska-Kearney, Kearney, NE, 68849, Leon G. Higley, Department of Entomology, 202 Plant Industry Building, University of Nebraska-Lincoln, Lincoln, NE, 68583

11:52 224 Damage by and control of European chafer infesting field-grown rhododendrons.
Michael E. Reding, Michael G. Klein and Ross D. Brazee, 1680 Madison Avenue, USDA-ARS, Wooster, OH, 44691

March 27, 2002
Wednesday Morning

MSU Bug House Tour
10:00 - Noon

Organizers
MSU students

March 27, 2002
Wednesday Afternoon

NCB Executive Committee
1:00 - 5:00 PM
Room 106

HAVE A SAFE TRIP HOME!

TAXONOMIC INDEX

Taxon	Paper/Poster (D) #
<i>Acalymma vittatum</i>	D159
<i>Aedes aegypti</i>	D126, D127
<i>Aedes taeniorhynchus</i>	D126
<i>Agromyza frontella</i>	028
Agromyzidae	028
<i>Agrotis ipsilon</i>	D100
<i>Ancistrocerus antilope</i>	088
<i>Anopheles gambiae</i>	084
<i>Anoplophora glabripennis</i>	D165
<i>Antistrophus rufus</i>	019
Aphididae	021, 031, 040, 042, 080, 083, D092, D102, D120, D131, D145, D163, D166, D167, 199
<i>Aphis glycines</i>	D120, D163, 199
<i>Aphthona lacertosa</i>	030
<i>Aphthona nigricutis</i>	030
Apidae	006
Arctiidae	091
<i>Bacillus thuringiensis</i>	034, D094, D105
<i>Beauveria</i>	044
<i>Beauveria bassiana</i>	D116
<i>Blattella germanica</i>	D128, D129
Blattellidae	D128, D129
Blattidae	D124
<i>Blissus occiduus</i>	D122, D123
<i>Bombus</i>	006
Braconidae	037, 038, 076, 086
Carabidae	043, 049, 065, 094, D138
Cerambycidae	024, 070, D099, D109, D130, D165
<i>Ceratoma trifurcata</i>	D149, 170
Cetoniinae	186
<i>Chaetocnema pulicaria</i>	D132
<i>Chionaspis pinifoliae</i>	078
<i>Chlaenius platyderus</i>	065
Chrysomelidae	020, 027, 030, 033, 035, 041, 048, 050, 079, D098, D101, D108, D118, D132, D135, D136, D137, D144, D149, D151, D152, D153, D155, D156, D157, D159, D167, 170, 203, 215, 216, 218, 219

Cicadellidae	053, D141
<i>Cicindela fulgida</i>	D111
Cicindelidae	D111
<i>Clothia</i>	217
Coccinellidae	039, 082, D095, D096, D113, D114, D148
<i>Coleomegilla maculata</i>	D095
Coleoptera	070
<i>Conotrachelus nenuphar</i>	173
Corixidae	075
<i>Cotesia flavipes</i>	076
<i>Cotesia glomerata</i>	086
<i>Cotesia rubecula</i>	086
Crambidae	032, 035, 051, D094, D105, D146, D158, 214, 222
Culicidae	084, D126, D127
<i>Cuphea</i>	219
Curculionidae	173, 190
<i>Cyclotrachelus alternans</i>	D138
Cynipidae	019
Danaidae	023
<i>Danaus plexippus</i>	023
<i>Dectes texanus texanus</i>	D109
<i>Diabrotica</i>	050, D118, D144, D135, D152, 216
<i>Diabrotica barberi</i>	035, D136
<i>Diabrotica virgifera</i>	D118, D152
<i>Diabrotica virgifera virgifera</i>	027, D101, D136, D153, D155, D156
Diaspididae	078
<i>Diatraea grandiosella</i>	032, 076, 212, 222
<i>Diatraea saccharalis</i>	076
<i>Diuraphis noxia</i>	D102
<i>Drosophila recens</i>	090
Drosophilidae	090
<i>Empoasca fabae</i>	053
<i>Endopiza viteana</i>	D164
<i>Euchetes egle</i>	091
Eulophidae	004
Eumeninae	089
<i>Galerucella californiensis</i>	203
Gelechiidae	034
<i>Glycine max</i>	D119
Gregarinidae	191
<i>Haematobia irritans</i>	211
<i>Harmonia axyridis</i>	039, D148
